

Board Approved October 2010

Twin Falls Public Library Wireless Internet Access Policy

The Twin Falls Public Library provides free wireless filtered access to the Internet using industry standard wireless equipment. Users may connect to the Internet from laptop computers or other wireless devices from most locations within the building. However, no printing services are available for wireless users.

Users are responsible for configuring their own equipment. The Library does not provide technical support for establishing or maintaining a connection nor equipment configurations.

The Library is not responsible for any changes made to an individual's computer settings and does not guarantee that a user's hardware will work with the Library's wireless connection.

The Library is not responsible for any personal information (i.e. credit card) that is compromised, or for any damage caused to hardware or software due to electrical surges, security issues or consequences caused by viruses or hacking. All wireless access users are individually responsible for maintaining current virus protection on personal laptop computers or wireless devices.

The Library reserves the right to terminate a wireless Internet session at any time.

Wireless users agree to abide by the Library's Computer Use and Internet Access Policy while using the Library's wireless network.
